DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-22 are rejected again under 35 U.S.C. 102(a) as being anticipated by JP 11098426.

As to claims 1, 5-13 and 15, JP 11098426 discloses the claimed subject matter, the claimed amplifying the received television signal is met by the tuner 20 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 2, the claimed limitation is disclosed by JP 11098426 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 3, the claimed limitation is inherently disclosed by JP 11098426.

As to claim 4, the claimed limitation is disclosed by JP 11098426 (Fig. 2, reference numeral 21, 12a, 12b, 15).

As to claim 14, the claimed AGC circuit is met by the AGC circuit 14a, 14b of JP 11098426 (Fig. 2)

As to claims 16 and 19-22, JP 11098426 discloses the claimed subject matter, the claimed RF tuner which includes a RF amplifier is met by the tuner 20 and the claimed AGC circuit which includes digital and analog IF circuit is met by the AGC circuit 14a, 14b (Fig. 2, paragraphs 0011-0016 of the translation).

Art Unit: 2622

As to claim 17, the claimed limitation is disclosed by JP 11098426 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 18, the claimed IF tuner is met by the IF processor 12a, 12b.

Response to Arguments

3. Applicant's arguments filed 12/15/06 have been fully considered but they are not persuasive.

With respect to claims 1 and 16, applicant states that JP 11098426 does not show or suggest the claimed "said second signal level is greater than said first signal level", the examiner disagrees with that statement. JP 11098426 clearly shows or suggests a first signal level (paragraph "solution" lines 10-11, decoded signal level) and a second signal level (paragraph "solution" lines 10-11 decoded signal level) and said second signal level is greater than said first signal level (as a discrimination is made as to the nature of the signal- analog or digital to provide different AGC control signals the reference levels are also different thus one level is greater than the other). Therefore, the rejection is maintained.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2622

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
